REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art in the record fails to disclose, teach or suggest a method or an apparatus to process a single channel audio signal to provide a plurality of audio-channel signals as specified in claims 1, 4, 5, 7, 15, 17, 19, 24 and 40 respectively. The claimed "a single channel audio signal" is being interpreted as a monophonic signal. The claimed "a plurality of audio channels" is being interpreted as audio channels with different signal contents that define an audio imaging, such as stereophonic imaging and surround sound imaging. Claim 24 specifies an audio processing system for receiving at its input terminal a monophonic signal and processing the monophonic signal to generate a center channel signal and a plurality of other output audio channel signals. The claimed "factor is variable with respect to time" as specified in claim 1 is being interpreted as a factor to create different changes in signal content in the plurality of audio channels; whereas a general volume control by the user will make same change in all the audio channels. The claimed "time-delaying" in claim 5 is being interpreted as a delay to create pseudo sound imaging.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
